

BIRDS: Homeopathic Remedies from the Avian Realm

Last Updated Wednesday, 27 December 2006

by Jonathan Shore, Judy Schriebman, and Anneke Hogeland

This book gives a detailed description of 15 birds as well as a complete overview of the avian kingdom. For each bird, the core idea is given as well as a number of outstanding key aspects. Proving information and cases from various practitioners fill out the picture of each bird.

Birds covered are: Pelican, Macaw, Dove, Hawk, Owl, Heron, Eagle, Raven, Peregrine Falcon, Sacher Falcon, Vulture, Condor, Penguin, Mute and Whooper Swan, and Albatross. Other birds will be covered in a future volume. In the sample you find a bit of the introduction and the Key Features section for the Pelican. The book retails for \$59.95. For ordering information click [here](#) Order Form.

The intent of this book is to bring together the currently available information on this group of remedies in a form which will facilitate both a good grasp of the characteristics of the group as a whole and the ability to focus down simply upon its individual members. Thus emphasis is placed not upon the small details but is rather weighted between the broad generals and the particular individualizing characteristics of each remedy. Although the body of knowledge in relation to these remedies is still in the early stages of development I believe we have sufficient data to paint pictures that are accurate in their broad outlines.”

- Jonathan Shore, MD, Introduction
