

ALIZE TIMMERMAN - October 14 - 17, 2010 - Lake Tahoe, CA

Gifts from the Mother A Residential Seminar

Join us for a four day residential seminar on the shores of California's beautiful Lake Tahoe. Fall foliage and autumn breezes will set the stage for a journey through the remedies made from human substances.

This journey shows many stages of development at physical, psychological, spiritual and social levels. Starting in 1998, Alize and colleagues from around the world began to develop and research a very special group of remedies via provings and triturations. These remedies have been made from DNA, Lac humanum feminine, Lac humanum masculine, Folliculinum, Carcinosinum, Amniotic Fluid, Placenta Feminine, Oxytocin, Umbilical cord, Vernix and Menstrual Blood.

This seminar will include a trituration from a substance connected to this group of remedies. Doing a trituration helps us to better understand the 'laws' of healing. Alize's practical approach gives her students a deep understanding of what 'curing and healing' really means. She shows us how we can observe healing, how it takes place, and how and why to treat chronic disease.

In this professional level seminar, we will enjoy Alize Timmerman's gift for teaching; she is both personable and knowledgeable, and makes even difficult concepts easy for anyone to understand.

THIS IS A SEMINAR YOU WILL NOT WANT TO MISS
